

Curriculum vitae
Pergolizzi Barbara

Personal details

Born in Torino
Nationality: Italy
Email: barbara.pergolizzi@unito.it
Website: https://www.dscb.unito.it/do/gruppi.pl>Show?_id=rq0i
ORCID ID: <https://orcid.org/0000-0003-4686-0068>
Scopus ID: 8781889800;
Researcher ID: GMW-7522-2022

Educations

1994 Degree in Biological Science at the University of Torino
1995 Professional Accreditation as a Biologist.
2001 Ph.D in "Immunology", University of Torino

Professional experiences and current position

1995-1996: Postgraduation course in the Molecular Biology Laboratory at the Medical School, University of Torino
1996-2000: Ph.D. training, Cell Biology Laboratory at the Medical school, University of Torino.
1997: Training in the Cell Biology Laboratory at the Max Planck Institute of Biochemistry, Munich, Germany.
2000: Ph.D. in Immunology
2001-2003: Post-doctoral fellow, University of Torino
2003-2006: Research Fellowship, University of Torino
2006: Researcher University of Torino
2009: Researcher Confirmed, University of Torino

Participation to Directive Boards of Scientific Societies and/or Institutions:

2006-today: Member of Italian Association of Biology and molecular and cellular Genetic. A.I.B.G

Honors

2004: Zanichelli Award as best scientific seminar of the young researchers at the A.I.B.G. meeting

Teaching activity:

1999-2005: Conducted tutoring activities in Cell Biology for the Nursing Science degree at the Medicine School, University of Torino (Orbassano).
1999-2000: Provided tutoring activities in Cell Biology for the Nursing Sciences degree at the Medicine School, University of Torino (Cuneo).
2000-2007: Engaged in tutoring activities in Cellular and Genetic Bases of Medicine at the Medicine School of Medicine, University of Torino.
2006-today: Professor and Coordinator for the Cell Biology & Genetic course at the Nursing Sciences School, Medicine School, University of Torino (Aosta).
2007/2008: Professor for Cell Biology and Genetic course at the Nursing Sciences School, Medicine School, University of Torino (Asti).
2009-2016: Delivered lectures as a Professor in the Cell Biology course at the School of Medicine and Surgery, San Luigi Gonzaga, University of Torino.
2013-2014: Conducted integrative teaching, including laboratory activities for the ADE course - Cell Biology research seminars - [MSL0002]. School of Medicine and Surgery, San Luigi Gonzaga, University of Torino.
2014-2015: Professor in the Genomics and Proteomics course at the School of Medicine and Surgery, San Luigi Gonzaga, University of Torino.
2017-today: Professor and coordinator in the cell biology for the Structure and Morphology of the Human Body Course in the Nursing Sciences School, University of Torino

2019-today: Professor and Coordinator in the cell biology course for the Structure and Morphology of the Human Body Course in the Nursing Sciences School, University of Torino (Orbassano).

2020-today: Invited as a professor to deliver lectures in the Model Systems in Biomedical Research course at the Department of Life Science, University of Trieste.

2022-today: Professor in the Molecular and genomic approaches for biological and applied studies course at the PhD in Biological Sciences and Applied Biotechnologies, University of Torino.

2015-today: Tutor and a member of the examination committees for the final exams of the Master's degree students in Cellular and Molecular Biology (LM-6), University of Torino.

2018-today: Tutor of PhD students for the PhD in Biological Sciences and Applied Biotechnologies and PhD

2019-today: Member of the CDP (Commissione Didattica Paritetica) for the Clinical and biological sciences department, University of Torino.

2021-today: Contributed as a member of the Research Commission at the clinical and biological sciences department, University of Torino.

2010-today: Assumed the role of Coordinator for the Proteomic Laboratory at the clinical and biological sciences department.

Research main topics

Main projects as PI:

-Mechanism of DNA repair in *Dictyostelium*; the molecular mechanisms regulating induced cellular migration, ii) the function of TORC2 complex and iii) the role of ubiquitination system in linked G-protein-receptor signaling, using as model organism the social amoeba *Dictyostelium discoideum*
Physiological and pathological roles of an E3 Ubiquitin Ligase named HERC1 in *Dictyostelium*, mammalian and leukemic cells.

- Role of oxygen in the cellular migration.

-Effect on health and environment as results of human exposure to non-biodegradable substances (POPs) using as a model the *Dictyostelium d.*

Bibliometry (***-present)** (www.scopus.com)
